
Riddle Token WhitePaper

Welcome to Riddle, a deflationary token that gamifies elements of DeFi and combines them with ARG to present challenges to holders and rewards those that successfully solve them.

Tokenomics

- Total Supply: One Quadrillion
- Burned tokens: 500 Trillion (50%)
- Circulating Supply: 470 Trillion(47%)
- Initial Prize Wallet Reward: 5 Trillion (0.5%)
- Marketing Wallet: 25 Trillion (2.5%)

Detailed Fee Breakdown

- 1% is redistributed to all holders
- 1% is burned forever
- 1% is added back to Liquidity
- 0.8% is sent to a Charity wallet
- 0.8% is sent to the Prize wallet
- 0.4% is sent to the Marketing wallet

Prize Wallets

To gain access to the prize wallet, holders must first solve the ARG challenges presented by the team. Prize wallets work on a first come-first serve basis, meaning that the first person that gets access to the wallet is able to collect the entire prize.

Burns

Every 24 hours, 50% of the tokens held in the prize wallet will be automatically burned to ensure a consistent price pool as more of the supply gets burned via regular transactions.

Requirements

To participate in the ARG challenge, you must hold at least \$10 BUSD worth of Riddle (a snapshot will be taken and the exact amount of Riddle tokens required will be set 24 hours before each new challenge begins).

Official ARG Launch

The first snapshot of Riddle will be taken 24 hours after our official launch and the first round will begin 24 hours after the snapshot is taken.

At this point the first round will begin and the initial challenge will be available at our website.

During round one, our other social media channels will also launch with additional clues and secrets for the community to solve.

Clues, puzzles and other challenges may appear in many different forms and it is up to the community to solve them. The secret word is storm. Devs will NEVER disclose any information or clues related to the challenge. Devs will also never contact you, request access to your wallet or accept any payments.

About the Devs

We are a group of ARG enthusiasts that have been exploring the DeFi space and saw an opportunity to do something that has never been done before. We hope by introducing our unique project, we can create a real ARG Community dedicated to challenging each other and innovating in both worlds of ARG and DeFi.
